

1998

**REUTERS BUILDING  
3 TIMES SQUARE  
NY NY**

Consultation on design and construction documents.

The new Reuters Building on Seventh Avenue and 42nd Street will occupy a pivotal point at the Crossroads of the World. Serving as a crucial link between the famous Times Square bow-tie area to the north and the newly revitalized 42nd Street theatre and entertainment district to the west, its charge is to be both a corporate icon and a dynamic fulcrum that draws visual energy from each.
